

FEDERAL UNIVERSITY OF TECHNOLOGY, MINNA
SCHOOL OF ELECTRICAL ENGINEERING AND TECHNOLOGY &
SCHOOL OF INFRASTRUCTURE, PROCESS ENGINEERING AND TECHNOLOGY

3rd INTERNATIONAL ENGINEERING CONFERENCE IEC 2019

THEME: THE ROLE OF ENGINEERING AND TECHNOLOGY IN SUSTAINABLE DEVELOPMENT

BOOK of PROCEEDINGS

DATE:
24TH - 26TH
SEPTEMBER 2019

VENUE:
CHEMICAL ENGINEERING
LECTURE THEATER, FEDERAL
UNIVERSITY OF TECHNOLOGY,
MINNA, NIGER STATE

EDITED BY

ENGR. DR. S.M. DAUDA, ENGR. DR. A.U. USMAN, ENGR. DR. U.S. DAUDA,
ENGR. M. ABUBAKAR, ENGR. DR. E.A. AFOLABI, ENGR. DR. I.M. ABDULLAHI,
ENGR. DR. (MRS) I.H. MUSTAPHA, ENGR. A.S. AHMAD, ENGR. J.G. AMBAFI,
ENGR. T.A. FOLORUNSO, ENGR. U.U. BUHARI, ENGR. DR. OPE OSANAIYE,
ENGR. A. YUSUF

FEDERAL UNIVERSITY OF TECHNOLOGY, MINNA
SCHOOL OF ELECTRICAL ENGINEERING AND TECHNOLOGY &
SCHOOL OF INFRASTRUCTURE, PROCESS ENGINEERING AND TECHNOLOGY

DATE: 24TH - 26TH SEPTEMBER 2019

THEME THE ROLE OF ENGINEERING AND
TECHNOLOGY IN SUSTAINABLE DEVELOPMENT

MEMBERS OF THE CONFERENCE ORGANISING COMMITTEE

Engr. Dr. S.M. Dauda	Chairman	Engr. Dr. U.S. Dauda	Member
Engr. Dr. A.U. Usman	Co-Chairman	Engr. Dr. M.D. Yahya	Member
Engr. Prof. R.A. Muriana	Member	Engr. Dr. B.A. Orhevba	Member
Engr. Dr. T.W.E. Adejumo	Member	Engr. Dr. Michael David	Secretary

TECHNICAL COMMITTEE

Engr. Dr. U.S. Dauda	Chairman
Engr. Dr. Eyitayo Afolabi	Member
Engr. Dr. A.I. Mohammed	Member
Engr. Dr. (Mrs) H.I. Mustapha	Member
Engr. A.S. Ahmad	Member
Engr. J.G. Ambafi	Member
Engr. T.A. Folorunso	Member
Engr. Buhari U. Umar	Member
Engr. Dr. Ope Osanaiye	Member
Engr. A. Yusuf	Member
Engr. M. Abubakar	Secretary

WELFARE COMMITTEE

Engr. Dr. M.D. Yahya	Chairman
Engr. Prof. R.A. Muriana	Member
Engr. Dr. A.J. Otaru	Member
Engr. Dr. E.A. Afolabi	Member
Engr. A. Yusuf	Member
Engr. Dr. B.A. Orhevba	Secretary

LOGISTIC COMMITTEE

Engr. Prof. R.A. Muriana	Chairman
Engr. D.N. Kolo	Member
Engr. Essien Akpan	Member
Mr. Idris Akintunde	Member
Mr. Mohammed Shehu	Member
Engr. Dr. T.W.E. Adejumo	Secretary

FINANCE COMMITTEE

Engr. Dr. B.A. Orhevba	Chairman
Engr. Prof. O.A. Olugboji	Member
Engr. Dr. M.D. Yahya	Member
Engr. Dr. H.I. Mustapha	Member
Engr. Bello Abdulkadir	Member
Engr. Buhari Umar	Member
Engr. Dr. M. Alhassan	Secretary

ICT COMMITTEE

Engr. Dr. Bala A. Salihu	Chairman
Mr Emmanuel Abba	Member
Mr Alenoghena Benjamin	Member

2nd International Engineering Conference (IEC 2017)
Federal University of Technology, Minna, Nigeria

CONTENTS

Content	Page

Acknowledgement	x
Statistical Optimization of Biodiesel Production from Jatropha Oil Using Calcined Snail Shell Catalyst <i>Afangide, U. N., Olutoye, M. A, & Aberuagba, F.</i>	1 – 5
Development of AgNPs-MWCNTs Adsorbent for Seawater Treatment <i>Mohammed, S. M., Muriana, R. A, Agboola, J. B, Abdulkareem, A. S., Kariim, I., & Yahya, M. D.</i>	6 – 14
The Role of Engineering and Technology and Sustainable Development Reducing Carbon Emission with Green and Sustainable Build Environment <i>Hashimu, L., Halilu, A, A., & Sani, I.</i>	15 – 23
Optimization and Kinetics Study of Biodiesel Synthesis from Beef Tallow Using Calcium Oxide from Limestone <i>Ogunjobi, T. O., Olutoye, M. A. & Aberuagba, F.</i>	24 – 33
Column Adsorption Studies of Textile Wastewater Using Iron Oxide Nanoparticles doped Zeolite A <i>Alaya-Ibrahim, S., Kovo, A.S., Abdulkareem, A.S., Adeniyi, O.D. & Yahya, M.D.</i>	34 – 43
A Comprehensive Review on Use of Poly Electrolyte Complex PEC as an Adsorbent for the Removal of Heavy Metals From Aqueous Solution. <i>Achanya, B. E. & M., Auta</i>	44 – 52
Computational Fluid Dynamics Simulation of FCC Regenerator of a Refinery <i>Usman, A. A., Onifade, K.R., Mohammed, I. A., & Garba, M.U.</i>	53 – 60
Assessment of Factors Affecting Stakeholder Management in Nigeria Construction Projects <i>Okusun, B. O., Idiake, J.E., Oyewobi, L.O., & Shittu, A.A.</i>	61 – 64
Effect of Partial Replacement of Fine Aggregate with Sawdust in Light Weight Concrete Production using Bida Natural Stone as Coarse Aggregate <i>Alhaji B., Abubakar M., Yusuf A., Oritola S. F, Mohammed S. & Kolo D. N.</i>	65 – 69
Quality Assessment of Locally Available Selected Cements in Nigeria <i>Muftau, O. S., Abdullahi, M., & Aguwa, J. I.</i>	70 – 76
Development of Mix Design Guide for Normal Weight Concrete using Locally Available Materials <i>Okoh S. O.; Abdullahi M.; & Alhaji, B.</i>	77 – 82
Comparative Evaluation of Strength of Compacted Lateritic Soil Improved with Microbial-Induced Calcite Precipitate <i>K. J. Osinubi, E.W. Gadzama, A. O. Eberemu, & T. S. Ijimdiya</i>	83 – 91
Effects of Urban Growth on Surface Temperature in Parts of Katsina State, Nigeria <i>Abdulsamad Isah & Abubakar A.S.</i>	92 – 98

2nd International Engineering Conference (IEC 2017)
Federal University of Technology, Minna, Nigeria

Kinetic Modelling and Error Analysis of the Bioremediation of Used Motor Oil Contaminated Soil Using Palm Bunch Ash as Stimulant Abdulyekeen, K. A., Aliyu, A, Abdulkarim, A. Y, Salis , A., & Abdulkarim, A. S.	99 – 103
Quantitative Risk Analysis for Communication Satellite Payload Babadoko, D . M, & Ikechukwu, A. D.	104 – 113
Characterization and Grading of South Eastern Nigerian Grown <i>Mangifera Indica</i> Timber in Accordance with British Standard 5268 Mbakwe C.C., Aguwa J.I., & Oritola S.F.	114 – 120
Characterization of Palm Kernel Shell as Lightweight Aggregate in Concrete Production Sunday I .O., Aguwa J.I. & Auta S.M.	121 – 125
Integrated Geophysical Investigation of the Failed Portion of Minna-Zungeru Road, Minna Niger State Osheku, G. A., Salako, K. A, & Adetona, A. A	126 – 132
Partial Replacement of Fine Aggregate with Waste glass in Concrete made from Bida Natural Aggregate Alhaji B., Kolo, D. N., Abubakar M., Yusuf A., Abdullahi, A. and Shehu, M.	133 – 137
Assessment of the Compressive Strength of Concrete Produced with Fine Aggregate from Different Locations in Minna Aminulai, H. O., Abdullahi, A., Abdulrahman, H. S., Alhaji, B., Joseph, O. F., Aliyu, S. Y.	138 – 143
Response Surface Optimisation of the Adsorption of Cu (II) from Aqueous Solution by Crab Shell Chitosan Babatunde E. O., Akolo S. A., Ighalo J. O. & Kovo A. S.	144 – 151
The Linear Transformation of a Block Hybrid Runge-Kutta type Method for Direct Integration of First and Second Order Initial Value Problem Muhammad, R., Yahaya, Y.A., & Abdulkareem, A.S.	152 -154
Groundwater Potential Mapping in Bosso Local Government Area, Niger State, Nigeria Abubakar, U.B. & Muhammed, M.	155 – 159
Optimization of Synthesis Parameters of Silica from Bentonite Clay Using Acid Leaching Ogwuche, A. S., Auta, M., & Kovo, A. S.	160 – 163
Chemical and Mineralogical Characterization of Locally Sourced Nigerian Clay Sumanu, O. M., Dim, P.E. & Okafor, J. O.	164 – 167
Production and Optimization of Bioethanol from Watermelon Rind using <i>Saccharomyces Cerevisiae</i> Igbonekwu, C . A., Afolabi, E. A., Nwachukwu, F.O.	168 – 173
Use of Carbide Waste as a Mineral Filler in Hot Mix Asphalt Murana, A.A. & Musa, Y.	174 – 182
Review of Bio Oil Upgrading from Biomass Pyrolysis Abdullahi, M. A, Garba, M. U, Eterigho E. J, & Alhassan, M.	183 – 192

2nd International Engineering Conference (IEC 2017)
Federal University of Technology, Minna, Nigeria

Optimization study of Deacetylation Process in the Synthesis of Chitosan from Red Shrimp Using Response Surface Method Atanda, A. S, Jimoh, A. & Ibrahim, A.A.	193 – 204
Optimisation Study on the removal Pb(II), Cd(II) and Ni(II) from Pharmaceutical Wastewater using Carbonized African Giant Snail Shell (<i>Archachatina marginata</i>) as an Adsorbent. Olanipekun, O., Aboje, A. A, Auta, M.	205 – 215
Ground Electromagnetic Prospecting for Potential Ore Mineralisation Zones in Tsohon- Gurusu Area of Minna, North Central Nigeria Ogale, O. D, Rafiu, A. A., Alhassan, D. U., Salako K. A., Adetona A. A. & Unuevho C.	216 – 222
Magnetic and Geoelectrical Prospecting for Gold Mineralisation Within Tsohon-Gurusu Area, Part of Sheet 164 Minna, North-Central Nigeria Omugbe, L. E, Salako, K. A, Unuevho, C.I, Rafiu, A. A, Alhassan, D. U, Ejepu, J. S, & Adetona, A. A.	223 -228
Road Stabilization Using Cold Bitumen for Low Traffic Road Kolo S. S., Jimoh, Y. A., Alhaji, M.M, Olayemi, J. & Shehu, M.	229 – 233
Sawdust Ash Stabilization of Weak Lateritic Soil Kolo S. S., Jimoh Y. A., Yusuf I. T, Adeleke O. O., Balarebe, F. & M. Shehu	234 – 238
Radio Refractive Index and Refractive Index Gradients Variation in a Tropical Environment I.M. Tukur, K.C. Igwe & J.O. Eichie	239 - 243
Vocational and Technology Education: A Viable Entrepreneurship Tool for Rapid Economic Growth Kareem, W.B., Abubakar, H.O. (Mrs.), Onuh, J., Abdulrahaman, T.S., Abdullahi S.M.	244 – 249
A 2-Step Hybrid Block Backward Differentiation Formula for the Approximation of Initial Value Problems of Ordinary Differential Equations Akintububo, Ben.G & Umaru Mohammed	250 – 254
Significant Delay Factors Affecting Completion Time of Public Sector Construction Projects in Niger State Mamman, J. E., Abdullahi, A. H., Isah, L. M.	255 – 260
Communication Frequency and Effectiveness on Construction Sites in Abuja, Nigeria Mamman, J.E., Abdullahi, A.H. & Isah, M.L.	261 – 269
Contribution of Quality Management Practices towards Building Collapse in Nigeria Yunusa, H., Makinde, J. K., & Oke, A. A.	270 – 277
Assessment of Ethical Practices at Different Stages of Public Housing Delivery in Nigeria Oluwadare, D. O. & Idiake, J. E.	278 – 285
Participation of Female Quantity Surveyors in the Nigerian Construction Industry Nnamoko, C. E	286 – 292
Performance Evaluation of WUPA Wastewater Treatment Plant Idu-Industrial Area, Abuja Saidu, M., Adesiji, A. R., Asogwa, E.O., Jiya, A.M. & Haruna, S.I.	293 – 296
Evaluation of Strength Characteristics of Compacted Deltaic <i>Chikoko</i> Clay Stabilized with Rice Husk Ash T.W.E. Adejumo & B. B. Olanipekun	297 – 303

2nd International Engineering Conference (IEC 2017)
Federal University of Technology, Minna, Nigeria

Empirical Impact Evaluation of Sales Promotional Mix on Sachet -Water Product Distribution on Enterprise Performance: A Survey of Selected Sachet- Water Outfits in Niger State Adima Julius Osaremen	304 - 312
Assessing the Level of Readiness to Adopt Building Information Modelling (BIM) Amongst Built Environment Professionals In Selected Northern Nigerian States Abubakar, I. T. & Oyewobi, L. O.	313 – 323
Design and Implementation of an SMS-based dynamic matrix LED Display Board Habibu, H., Chukwu , E. C., Latifa , Y., Haris, M. Y.& Okosun, O. E.	324 – 329
An Improved User Pairing, Subchanneling, and Power Allocation Algorithm For 5G Noma System. Muhammad Z.Z., Tekanyi A.M.S., Abubilal K.A., Usman A. D., Abdulkareem H. A. & Kassim A. Y.	330 – 337
Automation of Agricultural Machinery Operation Systems; An Imperative for Sustainable Development Bala Ibrahim	338 – 343
Electricity Generation using Locust Bean Waste and Coal in a Molten Carbonate Direct Carbon Fuel Cell Yakubu E., Adeniyi, O.D., Alhassan M., Adeniyi, M.I., Uthman H., and Usman A.A.	344 – 349
Design of a Programmable Solid State Circuit Breaker Ajagun, A. S., Abubakar, I. N., Yusuf, L. & Udochukwu P. C.	350 – 354
Design of an Arduino Based RFID Line Switching Using Solid State Relay with Individual Phase Selection Ajagun, A. S., Yusuf, L., Abubakar, I. N. & Yusuff, S. D.	355 – 361
Development of an Improved Adaptive Hybrid Technique to Mitigate Cross-Tier Interference in a Femto-Macro Heterogeneous Network Kassim, A. Y., Tekanyi, A. M. S., Sani, S. M., Usman, A. D., Abdulkareem, H. A. & Muhammad, Z. Z.	362 – 370
The Level of Awareness of Electrical Safety Among Energy Users in Sokoto State Umar, A., Abubakar, I. N., Yusuf, H. M. & Okosun, O. E.	371 – 376
Phytoremediation of Soil Contaminated with Brewery and Beverage Effluents using <i>Cynodon dactylon</i> Mustapha, H., Ehichoya, C. S & Musa, J. J	377 – 384
Application of Dreyfus Model of Skills Acquisition in Curbing Youth Unemployment Among the Motor vehicle Mechanic Students' in Nigeria Aliyu Mustapha, Abdulkadir Mohammed, Abubakar Mohammed Idris & Benjamin Oke	385 – 390
A Numerical Analysis of Convective Heat Transfer Rate from A Wavy Fin Projecting Horizontally From A Rectangular Base Okon, J. O.	391 – 396
Towards A Hybrid MQTT-COAP Protocol for Data Communications In Wireless Sensor Networks Nwankwo, E. I, Onwuka, E. N& Michael, D.	397 – 403
Toward a Hybrid Technique for Friends Recommendation System in Social Tagging Usman Bukar Usman	404 – 410
Towards A Model for Aspect Based Sentiment Analysis of Online Product Review Abdulganiyu, O. H. & Kabiru, U.	411 – 418

2nd International Engineering Conference (IEC 2017)
Federal University of Technology, Minna, Nigeria

Parametric Oscillations in Electric Oscillatory System <i>Enesi A. Y., Ejogu. E. C.</i>	419 – 423
Fenestration Effect on the Adequacy of Classroom UDD <i>Azodo, A. P., Onwubalili, C. & Mezue T. C.</i>	424 – 431
Prediction of Upper Limb Functional Ability in Post-Traumatic Patients Using Machine Learning. <i>Zaiyanu Nuhu, Yeong Che Fai, Elijah David Kure, Ibrahim B. Shehu, Mahmoud Mustapha, Rabiu Al-Tanko & Khor Kang Xiang</i>	432– 441
Arduino Based Automatic Irrigation System <i>Ibrahim Bashir Shehu, Zayyan Nuhu & Rbiu Altanko Ummaisha</i>	442 – 448
Production and Application Potentials of Sugarcane Bagasse Reinforced Polymer Composites for Acoustic Control <i>Sanda Askira Damboama</i>	449 – 456
Electromagnetic Field analysis of a Single-phase Induction Motor based on Finite Element Method <i>Omokhafa J. Tola, Edwin A. Umoh, Enesi A. Yahaya, Chika Idoko, Ayo Imoru</i>	457 – 463
Parameter Investigation and Analysis for Elite Opposition Bacterial Foraging Optimization Algorithm <i>Maliki, D, Muazu, M.B, Kolo, J.G, & Olaniyi, O.M.</i>	464 – 471
Multi-Access Edge Computing Deployments for 5G Networks <i>Mosudi, I. O, Abolarinwa, J, & Zubair, S.</i>	472– 479
Suitable Propagation Models for 2.4 GHz Wireless Networks: Case Study of Gidan Kwano Campus, FUT MINNA. <i>Ogunjide, S. B., Usman, A. U., & Henry, O. O.</i>	480 – 488
A Survey on Mobile Edge Computing: Focus on MEC Deployment, Site Selection Problems and Application Scenarios. <i>Atolagbe, M. I, Osanaiye, O.</i>	489 – 496
Influence of Processing Techniques and Packaging Materials on Anti- Nutritional Properties of Soybean Flour <i>Orhevba, B. A., Anehi, A. & Obasa, P. A.</i>	497 – 503
Prospects and Challenges of Off-Grid Power Generation For Rural Communities in Nigeria – Theoretical Perspective <i>Dangana Audu & Ikechuku A. Diugwu</i>	504 – 509
Spectrum Occupancy Measurement in the VHF Band- Results and Evaluation in the Context of Cognitive Radio <i>Ajiboye, J.A, Adegboye, B.A, Aibinu, A.M, Kolo, J.G</i>	510 – 514
Modelling and Simulation of Adaptive Fuzzy-PID Controller for Speed Control of DC Motor <i>Timothy Onyechokwa, Adegboye B. A. & A.S. Mohammed</i>	515 – 520
Implementation of Remote Patient Monitoring System using GSM/GPS Technology <i>Umar Abdullahi, Salihu Aliyu Oladimeji, Waheed Moses Audu, Muslim Saidu, Manasseh Wayo</i>	521 – 527
Comparism of Adaptive Neuro Fuzzy Inference System and Support Vector Machine for the Prediction of Immunotherapy Warts Disease <i>Abisoye, B.O, Abisoye, O.A, Kehinde Lawal, Ogunwede E mmanuel</i>	528 – 536

2nd International Engineering Conference (IEC 2017)
Federal University of Technology, Minna, Nigeria

Prediction of Epileptic Seizure using Support Vector Machine and Genetic Algorithm Abisoye, O. A, Abisoye, B.O, Ekundayo Ayobami, & Ogunwede Emmanuel	537 – 542
The Prediction of Cervical Cancer Occurrence Using Genetic Algorithm and Support Vector Machine Abisoye, O. A, Abisoye, B.O, Ekundayo Ayobami & Kehinde Lawal	543 – 549
Performance Evaluation of Ant Lion Optimization and Particle Swarm Optimization for Uncapacitated Facility Location Problem (UFLP) Shehu Hussaina & Morufu Olalere	550 – 558
Potential, Barriers and Prospects of Biogas Production in North- Central Nigeria Ahonle Jennifer Eferi & Adeoye Peter Aderemi	559 – 564
Design Analysis of Manually Operated Machine for On-Row Transplanting of Paddy Rice Ibrahim, T. M., Ndagi, A., Katun. I. M. & Anurika, U. A.	565 – 572
Investigation of Vulnerability of Oil and Gas Critical Infrastructures and Developing a Tracking Algorithm to track Malicious Attacks on the Streams Isah, A.O., Alhassan, J.K, Idris, I., Adebayo, O.S., Onuja, A. M.	573 – 580
Optimization of Process Variables in Bio-Waste Based Activated Carbon Preparation Using Response Surface Methodology. Onuoha, D. C., Egbe, E. A. P., Abdulrahman, A. S. & Abdulkareem, A. S.	581 – 589
Development of a Petroleum Pipeline Monitoring System for Detection, Location and Characterization of Damages in Pipes Aba, E. N, Olugboji, O. A, Nasir, A, Oyewole, A, & Olutoye, M. A.	590 – 598
Analysis of Maximum Power Point Tracking (MPPT) Techniques under Different Atmospheric Conditions: Technical Review Dania, D. E, Tsado, J, Nwohu, M, & Olatomiwa, L.	599 – 608
Development OF Briquette-Powered Water Distiller Muhammadu M. M, Unugbai, J. A, Bako M. D., Abubakar J. A.	609 – 614
Impact of SVC and DG Coordination on Voltage Constrained Available Transfer Capability (VSATC) Sadiq A. A, Adamu S. S, Abubakar I. N. & Yusuf L.	615 – 619
Construction of a Solar Powered Battery Forge Adimula, M. G., Abubakre, O. K., Muriana, R. A.	620 – 625
Financial Assessment of the Flood Risk Preparedness of Some Selected States in Nigeria Idachaba , A, Makinde, J & Oke, A.	626 – 631
Development of Spin Dryer Machine Alhassan T. Yahaya & Muhammadu M. M.	632 – 641
Assesment of Quality Control Management in Sachet Water Packaging T.J Bolaji and A.A. Abdullahi	642 – 648
Survey of Tractor Usage and Parts Breakdown in Niger State, Nigeria Dauda, S. M., Abdulmalik M.K., I syaku M. I., Francis A.A. & Ahmad D.	649 – 654

**2nd International Engineering Conference (IEC 2017)
Federal University of Technology, Minna, Nigeria**

Development of an Inspection Methodology for Peugeot 508 Bala Dauda & James Oseni Abu	655 – 660
Design and Fabrication of Banana Fiber Extractor machine and Performance Evaluation for the Reinforcement of Composites Odii Kinsley Chika & Ademoh N.A.	661 – 667
Optimisation of Biodiesel Production from Sandbox (<i>Hura Crepitans</i>) Seed Oil Usman M., Adebayo S., Aliyu M. & Dauda, S. M.	668 – 676
A Multi-source Broadband Radio Frequency Energy Harvester with Cascaded Diversity Combiner for Mobile Devices Ihemelandu, J. C., Onwuka, E. N., David, M., Zubair, S. & Ojerinde O. A.	677 – 683
Artificial Neural Network (ANN), a Formidable Tool for Atmospheric Forecasting. A Review Usman M.N., Aku I.G. & Oyedum O.D.	684 – 692
Development of a Model for Generation of Examination Timetable Using Genetic Algorithm Ahmed A., Umar B. U., Abdullahi I. M., Maliki. D., Anda I. & Kamaldeen J. A.	693 – 700
Smart Protection of Vehicle using Multifactor Authentication (MFA) Technique S. Aliyu , Umar Abdullahi, Majeedat Pomam, Mustapha Hafiz, Adeiza Sanusi, & Sodiq Akanmu	701 – 710
Development of Production Frame Work to Mitigate Corrosion in Under Groung Tanks Emenuwe Vincent & Aliyu Abdullahi	711 – 715
Physical Property Modification of Vegetable Bio-Cutting Oil Using Garlic as EP Additive Sanni John	716 - 719
Soil Moisture and Nutrients Control: An Automated Design Proposal Mustapha Mohammed, Elijah David Kure & Yusuf Mubarak	720– 727

**2nd International Engineering Conference (IEC 2017)
Federal University of Technology, Minna, Nigeria**

FORWARD

The School of Engineering and Engineering Technology, Federal University of Technology, Minna, organized the 1st and 2nd International Engineering Conference in 2015 and 2017 respectively. With the emergence of the new School of Electrical Engineering and Technology and the School of Infrastructure, Process Engineering and Technology, the two schools came together to organize this 3rd International Engineering Conference (IEC 2019) with the theme: “The Role of Engineering and Technology in Sustainable Development” considering the remarkable attendance and successes recorded at the previous conferences. The conference is aimed at offering opportunities for researchers, engineers, captains of industries, scientists, academics, security personnel and others who are interested in sustainable solutions to socio-economic challenges in developing countries; to participate and brainstorm on ideas and come out with a communiqué, that will give the way forward. In this regard, the following sub-themes were carefully selected to guide the authors’ submissions to come up with this communiqué.

1. Engineering Entrepreneurship for Rapid Economic Growth.
2. Regulation, Standardization and Quality Assurance in Engineering Education and Practice for Sustainable Development.
3. Solutions to the Challenges in Emerging Renewable Energy Technologies for Sustainable Development.
4. Electrical Power System and Electronic as a Panacea for Rapid Sustainable Development
5. Promoting Green Engineering in Information and Communication Technology
6. Reducing Carbon Emission with Green and Sustainable Built Environment
7. Artificial Intelligence and Robotics as a Panacea for Rapid Sustainable Development in Biomedical Engineering
8. Petrochemicals, Petroleum Refining and Biochemical Technology for Sustainable Economic Development.
9. Advances and Emerging Applications in Embedded Computing.
10. Traditional and Additive Manufacturing for Sustainable Industrial Development.
11. Emerging and Smart Materials for Sustainable Development.
12. Big Data Analytics and Opportunity for Development.
13. Building Information Modeling (BIM) for Sustainable Development in Engineering Infrastructure and Highway Engineering.
14. Autonomous Systems for Agricultural and Bioresources Technology.

The conference editorial and Technical Board have members from the United Kingdom, Saudi Arabia, South Africa, Malaysia, Australia and Nigeria. The conference received submissions from 4 countries namely: Malaysia, South Africa, the Gambia and Nigeria. It is with great joy to mention that 123 papers were received in total, with 0.9 acceptable rate as a result of the high quality of articles received. Each of the paper was reviewed by two personalities who have in-depth knowledge of the subject discussed on the paper. At the end of the review process, the accepted papers were recommended for presentation and publication in the conference proceedings. The conference proceedings will be indexed in Scopus.

On behalf of the conference organizing committee, we would like to seize this opportunity to thank you all for participating in the conference. To our dedicated reviewers, we sincerely appreciate you for finding time to do a thorough review. Thank you all and we hope to see you in the 4th International Engineering Conference (IEC 2021).

Engr. Dr. S. M. Dauda

Chairman, Conference Organizing Committee

**2nd International Engineering Conference (IEC 2017)
Federal University of Technology, Minna, Nigeria**

ACKNOWLEDGEMENT

The Chairman and members of the Conference Organizing Committee (COC) of the 3rd International Engineering Conference (IEC 2019) wish to express our gratitude to the Vice Chancellor and the management of the Federal University of Technology, Minna, the Deans and all staff of the School of Electrical Engineering and Technology (SEET) and the School of Infrastructure, Process Engineering and Technology (SIPET) for the support towards the successful hosting of this conference. We also thank the entire staff of the university who contributed in one way or the other. We are sincerely grateful to you all.

Optimization of Synthesis parameters of silica from Bentonite Clay using acid leaching

ABSTRACT

The synthesis of silica adsorbent from natural clay obtained from Obajana, Kogi state, Nigeria was carried out using thermal and acid treatment processes. The calcined clay particles was added in 50ml of 5.00M H₂SO₄ solution and left for stirring at 100°C for 1.00hour decanted to obtain the silica reach clay. The leached clay particles were washed thoroughly with distilled water until a neutral pH was obtained. The raw clay was characterized to determine its properties using X-ray fluorescence (XRF) analysis and the effect of the thermal treatment was determined using X-ray diffraction principle. The leached clay sample using experimental design was analyzed using atomic absorption spectroscopy. The results indicated that the clay sample was rich in silica which emanated from 62.67% efficiency of leaching of alumina content present.

Keywords: Silica, Bentonite clay, Calcinations, Leaching, Acid treatment, Optimization.

1. INTRODUCTION

Silica is extensively found in nature either as a major mineral in most igneous (e.g. granite) or sedimentary (e.g. sand and sand stone) or metamorphic rocks (quartzite, gneiss) (Usama *et al.*, 2015). Silica is most commonly found in nature as quartz, as well as in various living organism. Silica particles have found applications in a variety of fields including drug delivery systems, catalysis, biomedical, biological imaging, chromatography, sensors, and liquid armors and as filler in composite materials (Usama *et al.*, 2015). Clay is a potential source of silica, which contains smectite as a main clay mineral. As alumina component is present in clays along with silica, a range of acid and alkali hydrometallurgical methods are employed to isolate them from each other (Essien *et al.*, 2011). Usually acids are used for the processing of clay rather than alkalis (Ajemba and Onukwuli, 2012) and H₂SO₄ is preferred over other acids due to the easy separation of filtrate from the residue (Usama *et al.*, 2015). For effective removal of alumina from clays, calcination is a critical step; solubility of alumina increases after thermal treatment in the temperature ranges of 500–900°C (Aghbasho *et al.*, 2012).

Previously, kaoline clay was studied for the production of aluminum sulfate and it was found that heating the clay to 700°C for 1 h followed by acid leaching with sulfuric acid (H₂SO₄) were the optimum conditions to extract alumina (Essien *et al.*, 2011). In the present study, silica particles were synthesized from bentonite clay in nanometer and micrometer size range. Alumina content in bentonite clay was lowered by a series of thermal and acid treatments.

Clays are very abundant on the earth's surface; they form rocks known as shale and are major component in nearly all sedimentary rocks. The small size of the particles and their unique crystal structures give clay materials special properties, including cation exchange capabilities,

Plastic behavior when wet, catalytic abilities, swelling behavior, and low permeabilities, (Al-Zahrani and Abdul-Majid., 2009).

This research is aimed at extracting out alumina component of the bentonite clay sample. It will involve calcination of the raw clay sample, acid leaching of the calcined clay and analysis of the leached sample.

2. METHODOLOGY

2.1 MATERIALS

The clay sample used in this research was mined from Obajana in Kogi state north central of Nigeria. The clay was analyzed to determine its chemical composition using x-ray fluorescence spectrometer (XRF). Tetraoxosulphate VI acid (H₂SO₄) was purchased from panlac and used without further purification.

2.2 PRETREATMENT OF THE CLAY SAMPLE

The clay sample was oven dried at 105°C for 12 hours, crushed and sieved to 75 mm particle sizes. The sieved samples were then calcined in a muffle furnace at temperature of 700° C for 2 hours

2.3 LEACHING OF SILICA FROM OBJAJANA CLAY

About 10 g of the calcined Obajana clay was added to 250 mL conical flash containing 50 mL of predetermined concentration of H₂SO₄ solution which was stirred at a temperature of 100°C for 1.00 hour as specified by the experimental design (design experiment software) using response surface methodology application. The experimental design for the experiment is presented in Table 2. At the end of each reaction time, the undissolved materials in the suspension was allowed to settle and separated by decantation. The resulting solutions were diluted and analyzed for alumina content determination using atomic absorption spectrophotometer (AAS). The residue was also collected, washed to neutrality with distilled water, and oven dried at 105° C.

3. RESULTS AND DISCUSSION

3.1 CHARACTERIZATION OF RAW OBJAJANA CLAY SAMPLE

The XRF analysis of the Obajana clay used revealed that the clay was more of a bentonite material as it had higher silica to alumina ratio (> 1:1) than the usual kaolinite. The silica content of the clay was 62.67%. The XRF characterization result of the lay is presented in Table1.

TABLE 1: XRF ANALYSIS OF OBJAJANA CLAY SAMPLE

Composition	Raw clay (%)	Calcined at 700°C
SiO ₂	62.67	65.85
Al ₂ O ₃	14.91	15.99
Fe ₂ O ₃	4.90	1.47
CaO	0.13	0.07
MgO	1.77	2.10
K ₂ O	1.98	2.27
Na ₂ O	2.07	1.73
LOI	10.50	3.70

3.2 CALCINATION OF OBJAJANA CLAY SAMPLE

The calcinations process was done in order to reduce the volatile matter content of the raw clay sample and to improve its susceptibility to acid leaching. The XRD analysis of the raw and calcined clay sample to determine the effect of the thermal treatment on it and the result is presented in Figure 1. The XRD patterns revealed presence of crystalline peaks of quartz on the both uncalcined and calcined clay samples. However, peaks of both kaoline and montrimorillonite were visible in the spectrum of the calcined Obajana clay (Usama et al., 2016). The XRD pattern revealed an amorphous phase between 11-14° θ. In pure bentonite, peaks of Kaoline exist in this region which disappears after thermal treatment and substituted with an amorphous band. This indicates the transformation of the kaoline content of the clay to amorphous metakaoline (Ajemba and Onukwuli, 2012). Calcination of bentonite clay causes it to dehydrate and further heating beyond 680 °C leads to dehydroxylation reaction (zymankowska et al., 2012).

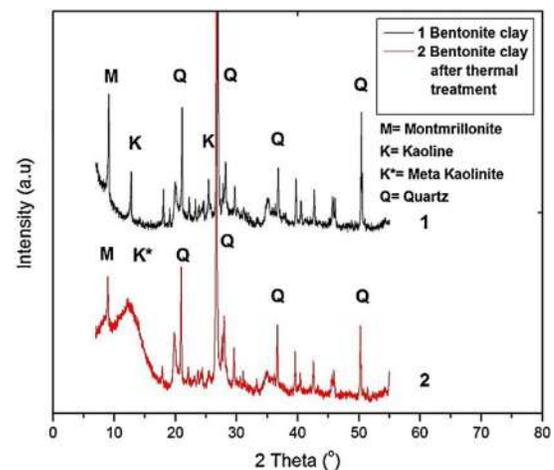

Figure 1: XRD patterns of Obajana clay before and after thermal treatment at 700°C for 1 h.

3.3 THE AAS ANALYSIS OF THE ACID LEACHED CLAY SOLUTION

The various acid leached samples using the concentration of H₂SO₄, reaction time and temperature obtained from the experimental design using RSM were analyzed using AAS to determine the alumina content. The stirring speed and dosage were kept constant in the 20 experimental runs obtained from the software (Sudamalla et al., 2012). The results of the analysis at various conditions are presented in Table II. It was observed that a non-dominated optimal response of 79.51% yield of alumina removal at 5.00 M sulphuric acid concentration, 60 min leaching time, 0.085 g/ml dosage and 214 rpm stirring speed was established as a viable route for reduced material and operating cost.

TABLE II: THE AAS ANALYSIS OF ALUMINA IN THE ACID
LEACHED CLAY SOLUTION

Run/Order	Temp (°C)	Time(min)	Conc(M)	Alumina yield(%)
1	80.00	180.00	3.50	28.60
2	80.00	21.82	3.50	26.98
3	80.00	180.00	3.50	28.60
4	100.00	60.00	2.00	30.43
5	46.36	180.00	3.50	44.22
6	100.00	60.00	5.00	79.51
7	80.00	180.00	3.50	28.60
8	80.00	180.00	0.98	29.21
9	80.00	381.82	3.50	54.36
10	80.00	180.00	6.02	22.72
11	113.64	180.00	3.50	56.795
12	60.00	300.00	5.00	33.874
13	60.00	300.00	2.00	87.63
14	80.00	180.00	3.50	28.60
15	100.00	300.00	5.00	69.37
16	80.00	180.00	3.50	28.60
17	100.00	300.00	2.00	55.98
18	80.00	180.00	3.50	55.984
19	60.00	60.00	5.00	50.719
20	60.00	60.00	2.00	26.77

were analysed in phases. The observed trends suggest that by proper adjustment of the system variables within the sampled space, a valid optimal could be attained. The results conform largely to what is already known for alumina removal processes (Ajemba and Onukwuli, 2012). Nevertheless, one noticeable unusual result may be the apparent linear (one-directional) response observed in the system response with respect to dosage ratio axis. This does not reflect a typical behavior of batch dissolution processes. Clay particle congestion which occurs at high dosage ratio in the reactor and increased turbulence associated with high stirring rate is formally expected to introduce significant nonlinearities or at least a quadratic behavior in the system response. The consistent linear behavior (in which increasing the input value leads to a corresponding increase in output with respect to dosage ratio) implies that no definite optimal solution could be obtained for the two variables. If such optimal condition exists for the present case, then it definitely lies in a range outside the sampled space. The selection of a useful optimal condition for the two variables would thus be guided strictly by a balance of compromise between their effects on system response and economic implication. The maximum removal of alumina is predicted on the optimum condition from the RSM result by the AAS analysis.

3.4 ANALYSIS OF THE RSM EXPERIMENTAL RESULT YIELDED 3D SURFACE PLOTS PRESENTED IN FIGURE 2.

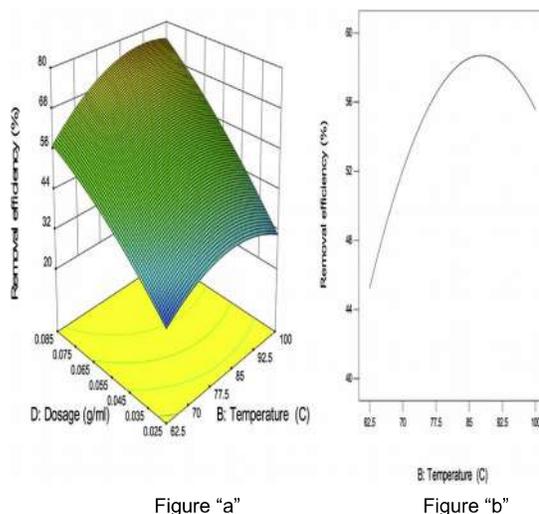

Figure 2: 3D Surface (a), and single effect (b) plot for effects of dosage ratio and reaction temperature on alumina removal from Obajana clay.

The combined effects of adjusting the process variables within the design space were monitored using 3D surface plots. Every significant interaction effects on the system response between two independent variables

4. CONCLUSIONS

Silica was synthesized from bentonite clay after sequence of acid and thermal processes. The experiment investigated the optimum condition for the extraction of alumina from obajana clay using RSM method from design expert software. The results revealed that H₂SO₄ can successfully leach alumina from clay to about 79 %.
