

**DEPARTMENT OF CHEMISTRY
FEDERAL UNIVERSITY OF TECHNOLOGY,
MINNA**

SECOND SEMESTER TEST 2018/2019 SESSION

**COURSE CODE: CHM 525 COURSE TITLE: Natural
Products Chemistry**

TIME ALLOWED:

**INSTRUCTIONS: Answer All Questions by filling the spaces
provided**

Q1. Provide the name for this structure, $\text{CH}_3\overset{\text{O}}{\underset{\text{||}}{\text{C}}}\text{-CoA}$

.....

Q2. Write out the structure of malonyl-CoA.....

Q3. What is the name of the compound having this structure $\text{CH}_3\overset{\text{O}}{\underset{\text{||}}{\text{C}}}\text{-CO}_2\text{H}$

.....
Q4. Polyketides and fatty acids are formed by the linear combination of

.....
Q5. What are terpenes and terpenoids and where are found in plants? List five examples in each case. Name any three of these compounds that would be extracted in hexane and chloroform in each case.....

.....
.....
.....
.....
.....
.....

Q6. From which unit is terpenes biosynthetically derived? Provide its molecular formula, IUPAC name and activated forms with names and

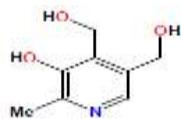

structures. How would you biosynthesise squalene from these terpenoid intermediates? How are these units joined together to built up monoterpenes and sesquiterpenes?

.....
.....
.....
.....
.....
.....
.....

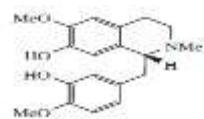

Q7. Write a short note on alkaloids

.....
.....
.....
.....
.....
.....
.....
.....
.....
.....
.....

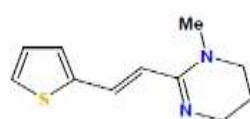

Q8. Identify and name the heterocycle(s) in these drugs as derivatives of natural products.

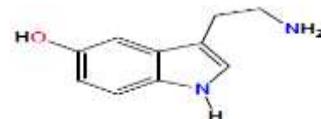

(a) Vitamin B6
Serotonin

(b) Reticuline

(c) Pyrantel

(d)

Q9. List out the purification steps in natural products isolation strategy

.....
.....
.....
.....
.....
.....
.....
