FIRST SEMESTER 2015/2016 SESSION
400LEVEL ARCHITECTURAL DESIGN IV (ARC411)

Upgrading of clinic at Gidan Kwano campus, Federal University Technology, Minna.

The clinic in FUT, Minna at Gidan Kwano campus provide many services to both staff and students in the university but the facilities are not adequate and some are not even available at all.

You are commission to upgrade the Clinic to an Hospital standard that can provide satisfactory service to both staff and students.

STEPS TO FOLLOW:

- Evaluate the existing facilities.
- Obtained data on what the management of the Clinic knew they don't have and need to be provided.
- Provide all drawings to show existing facilities
- How you want to upgrade the clinic to hospital standard.
- Then, your proposed upgraded hospital

REQUIRED DRAWINGS:

- Drawings of the hospital as it is now
 - Organogram of hospital.
 - Case Studies to broaden your horizon (At least 3no=local + foreign)
 - Space analysis for the facilities.
 - Transition drawings –how you intend to work on the existing facilities (retained, demolished and expand) and what the spaces are to be use for.
 - Added facilities to existing ones.
 - Full drawings of the upgraded hospital.
- NOTE: Demolition must be minimal, not more than 20% of the existing.
