**DEPARTMENT OF ARCHITECTURE**

ARCHITECTURAL DESIGN I (ARC 211) FOR 2015/2016 SESSION

**Brief for first assignment**

You are to design a residential kitchen with a food store attached as part of a two bedroom apartment bearing in mind that kitchen efficiency depends on the work triangle. The first step is to research on what the design considerations are for a good, efficient kitchen. A report on this would be submitted along with the design.

Each student is required to present the following

1. A well dimensioned Floor plan showing all fittings and fixtures in the kitchen
2. Two sections showing foundation details

All drawings are to be done to scale 1:50 and dimensioned in mm.
