

FEDERAL UNIVERSITY OF TECHNOLOGY, MINNA

FIRST SEMESTER 2018/2019 C. A TEST

EDU 312 ICT IN EDUCATION

UNIT: 2

INSTRUCTION: ANSWER ALL THE QUESTIONS

40 Minutes

- 1 Mention 4 fundamental words in the definition of computer.....
- 2 Which programming language is closely related to human language.....
- 3 The scanner is an example of device
- 4 What and what memory constitutes the primary storage device of a computer.....
- 5 Mention one example of Microcomputers.....
- 6 Which type of computer combines the operations of the analogue and digital computer.....
- 7 Which programming computer language does not require any interpreter.....
- 8 Minicomputers are sometimes called.....
- 9 The execution of a programme is a function of
- 10 If the ATM machine dispenses to you 21000 naira instead of 20000 naira only, the error is from.....
- 11 How many storage devices do the computer have.....
- 12 Flash disk is an example of.....device
- 13 The information in the storage device is volatile, this refers to
- 14 Data not immediately accessible to the processor are stored in the.....storage device
- 15 Special purpose and general purpose computers are classification of computers based on.....
- 16 Mention the source of the word computer.....
- 17 Mention the two classes of software.....and.....
- 18 The instructions that directs the computer on what you ask it to do is called.....
- 19 The Analogue computer is used to measure scientific data which are continuous in nature eg,.....
- 20 It cannot perform any other operations other than the purpose for which it is made refers tocomputer
- 21 The programming language requires a translator to translate it to machine language, this is a demerit of which type of programming language.....

- 22 Input, output and central processing unit are.....components of the computer
- 23 They are used to process information for millions of users, this best explains which type of computers.....
- 24 Mention one device that revolutionized the computer industry in 1970-1990 generations of computers.....
- 25 They are special high capacity computers used by large organizations, this refers to.....computers
- 26 Analogue computers are used to process.....data
- 27 The modern age computers started at around.....
- 28 Petrol dispenser machine uses which type of computer.....
- 29 The information that you can never forget in your life is stored in the cerebrum of the brain, name similar device in the case of a computer memory storage.....
- 30 It is designed to meet the needs of many different applications, this description fits which type of computer.....
- 31 Mention one computer based on the operating principles.....
- 32 When working as a system it combines the advantages of analogue and digital computers, this refers to.....
- 33 The smooth running of the operating system and other application programmes is a function of.....
- 34 Mention one kind of data that can be in the computers.....
- 35 Give the full meaning of the following programming languages used to communicate with the computer:
 - i. ML
 - ii. LLL
 - iii. HLL

Mention the technology that was used during the generations of these computers:

- 36 1951-1957
- 37 1991-Date
- 38 1964-1969
- 39 1958-1963
- 40 1970-1990

GOOD LUCK
