

FEDERAL UNIVERSITY OF TECHNOLOGY, MINNA
Department of Geography

FIRST SEMESTER EXAMINATIONS, 2010/2011 SESSION

GRY 513: Environmental Perception

INSTRUCTIONS: Answer any FOUR questions. Credit will be given for use of relevant diagrams and specific examples

TIME ALLOWED: Two and a half hours

Explain

1. Why may two persons exposed to the same external stimulus respond differently?
Support your answer with specific examples.

2. With reference to specific examples, examine the value of environmental perception studies in contemporary times.

Describe

3. Why are there increasing conflicts between arable farmers and nomadic pastoralists in the Nigerian environments, and what possible solutions can you suggest?

4. For any development project that you have studied, outline and evaluate the strategy of public participation that was employed.

Define

5. What is human culture, and how does it function as a factor in resource creation?

Define

6. What are natural hazards, and how competent are primitive societies to respond to them? Support your answer with specific examples.
